EXPERIENCE

Mobile Engineering Virtual Experience Program

Lyft

📅 08/2023   📍 Virtual

- Worked on integrating payment information into an Android app.
- I implemented functionality to determine the closest driver in another Android app.

PYTHON PROGRAMMING AND MACHINE LEARNING

Ybi Foundation

📅 09/2022   📍 Virtual

- Gained proficiency in Python, a versatile and widely used programming language.
- Learned the foundational concepts of machine learning, including supervised learning, unsupervised learning,and reinforcement learning.

PROJECTS

Student Management API

📅 02/2024

- Built RESTful web services using Spring Boot 3 and developed three-layer architecture (Controller, Service, and Repository) in the Spring Boot application.
- Used Spring Data JPA and the Postman client to test the REST APIs

HOSTELEASE

📅 03/2023

- Designed an Android app using android studio to cater to the needs of managing hostels within a college or university campus.
- The front end is implemented in XML using Intents and RecyclerViews.
- The backend is done using Kotlin based on MVVM architecture using Firebase as database and data binding.

EDUCATION

Bachelor of Technology in Computer Science Engineering (with specialization in Artificial Intelligence)

KIET Group of Institutions

📅 11/2021 - Present

Intermediate with Physics, Chemistry, Mathematics and Computer Science with 91% aggregate

Boys' High School & College

📅 04/2018 - 04/2020

SKILLS

JAVA   C++   Spring Boot   Android Studio   MySQL   Firebase   IntelliJ IDEA   DSA

ACHIEVEMENTS

Led a team of 4 members and secured 10th position out of the top 100 teams selected in Reckon 5.0 Hackathon

Winner of the football tournament Spardha22 and Rann23
